I think there are two "return" statements missing. That is the reason why my MCTruthMatch always returns false.

In PndAnalysis.h in function

```
Bool_t MctMatch(RhoCandidate& c, RhoCandList& mct, Int_t level = 2, bool verbose=false)
(Line 55)
```

and in PndAnalysis.cxx in function

```
Bool_t PndAnalysis::McTruthMatch(RhoCandidate* cand, Int_t level, bool verbose)
(Line 764)
```

Can someone check this and add this to svn?

Thanks and Best Regards

Simone
