Dear All,
in the detailed investigation that I'm carring out on the vertex-fit, I found an error in the class PndChiVtxFitter.cxx at line 255 in the definition of a TVector3.
Please can you upload the correction? (here in attachment).
Moreover, I found a lot of negative chi2..... Does somebody of you know how can this be possible and can have a look on this problem?

Thanks in advance,
Regards
Laura
