Dear Stefano,

Thank you for reply. Here is complete message after cmake,

```
CMAKE_Fortran_COMPILER full path: /usr/local/bin/gfortran
Fortran compiler: gfortran
Set BuildType DEBUG
--- Found a Mac OS X System 10.6
--- Found GNU compiler collection
--- Build Type: Debug
--- Compiler Flags: -m64
CMake Error at CMakeLists.txt:34 (SetBasicVariables):
  Unknown CMake command "SetBasicVariables".
```
