---

I have rerun the analysis of my 2000 events which were crashing, and now the analysis goes smoothly.

The only "strange" thing is coming from several error messages in the fitters, which are not crashing:

Error in <Inv5x5>: matrix is singular

PndVtxPRG: COVi Inversion failed, abort fit.

Error in <PndVtxPRG::PndVtxPRG::FitNode()>: Fit failed for composite 0x7fbad4384d60. Set chisquare to 172239904.

I hope they are fine.
