Hi Ronald,

after the PID values have been stored in the RhoCandidate by the PndAnaPidCombiner (or PndAnalysis::FillList, which does this internally), you should be able to access the Pid Probs by

RhoCandList list;

...

```
list[i]->GetPidInfo(0); // Electron Prob  
list[i]->GetPidInfo(1); // Muon Prob  
list[i]->GetPidInfo(2); // Pion Prob  
list[i]->GetPidInfo(3); // Kaon Prob  
list[i]->GetPidInfo(4); // Proton Prob
```

Best,
Klaus
