Edit: Disregard, didnt have threshold set to an appropriate decimal.

Greetings,

When I apply the above prescription, I get the following warnings

Warning in <PHadronDecayM1::sampleM1>: not enough energy

Warning in <PHadronDecayM1::SampleMass>: failed in [g + p_m1_p_eta'], ecm=1.849045

Warning in <PChannel::Genbod>: No mass sampling model(s) found in g + p --> p + eta'

I do get a distribution and the codes exits successfully, I thought I would report it.
