Hi Elisabetta,

could you try to use the PndKinFitter instead and compare? It works like this:

```
PndKinFitter fitter(Ds2535[j]);  
fitter.Add4MomConstraint(ini);  
fitter.Fit();
```

```
double chi2_4c = fitter.GetChi2();  
double prob_4c = fitter.GetProb();
```

```
if ( prob_4c > 0.01 )  
{  
    RhoCandidate *dstarfit = Ds2535[j]->Daughter(0)->GetFit();  
    ...  
}
```

Best,
Klaus
