
Subject: Error to get the output file from grid to local system

Posted by [Ajay Kumar](#) on Fri, 13 Sep 2013 13:28:04 GMT

[View Forum Message](#) <> [Reply to Message](#)

Dear Grid experts,

I have followed the grid tutorial Dec-2012 for the submission of jobs on the PANDA grid. I have submitted the job and getting the output file with the archive data.zip format. When I am going to copy generated root file from grid to local machine, could not get individual root file(sim.root etc),but getting archive data.zip format with error messages. Then I have extract the zip folder and checking the file are these ok or not. I found that all are ok.

If I will copy directly .zip format by get command, it shows same messages.

Message goes like as:-

```
</prod/run1/002 > get prod_files_run1.zip /home/ajay/Desktop/

Are these error messages normal??

Also I wanted to delete some useless directory from my grid account but I could not delete, so please tell me about the command by applying that I can delete the directory.

Thanks
