Hi,

I have run the simulation after the compile time of root file why it is giving error? Although I am able to open the root file in TBrowser.

```
kumar@ikp565:/private/kumar/pandaroot/macro/run/shyamana/dedxband> root -l  
sim_complete1.root  
root [0]  
Attaching file sim_complete1.root as _file0...  
Error in <TClonesArray::SetClass>: called with a null pointer  
root [1]
```
