Hi,

I have run the simulation after the compile time of root file why it is giving error? Although I am able to open the root file in TBrowser.

kumar@ikp565:/private/kumar/pandaroot/macro/run/shyamana/dedxband> root -l

sim\_complete1.root

root [0]

Attaching file sim\_complete1.root as \_file0...

Error in <TCloner::SetClass>: called with a null pointer

root [1]
