Hi,

I have run the simulation after the compile time of root file why it is giving error? Although I am able to open the root file in TBrowser.

```
kumar@ikp565:/private/kumar/pandaroot/macro/run/shyamana/dedxband> root -l
sim_complete1.root
root [0]
Attaching file sim_complete1.root as _file0...
Error in <TClonesArray::SetClass>: called with a null pointer
root [1]
```
