Hi,

a bachelor student of mine just had problems running simulations with the apr13 ext packages and I found out that there is a typo in the installation script of geant4 not setting the symbolic link correctly (scripts/install_geant4.sh).

```
line 80:    if [ ! -L $install_prefix/share/Geant4/data/G4SAIDDATA ]; then
line 81:    ln -s $install_prefix/share/Geant4/data/${G4SAIDDATA_VAERSION}
$install_prefix/share/Geant4/data/G4SAIDDATA
```

Best regards,

Stefan
