Your dec file should be like:

```
noPhotos
Decay pbarpSystem
1.0 anti-Lambda0 Lambda0 LambdaLambdaBar 1.643;
Enddecay
```

```
Decay Lambda0
1.0 p+ pi- PHSP;
Enddecay
```

```
Decay anti-Lambda0
1.0 anti-p-pi+ PHSP;
Enddecay
```

End

where 1.643 is the momentum of your antiproton (in this case it is 1.643, but you can oput your value).

Remember to use EvtGenDirect and set the same momentum value in the sim_complete.
