Hi, I produced sim_complete.root file with sim_complete.C example (using dpm generator) and try to use it for the Lambda analysis. I use example macro ana_Lambda.C, just slightly modify it (attached). When I try to access MC track information I found out that fMcCands->GetEntriesFast() is equal to zero -> no loop over fMcCands. MCTrack tree is not empty. Could you please tell me what is wrong?
