> Dear EvtGen users.
>
> It has been quite a while since we had focused discussion about EvtGen and we think it
would be good idea to get EvtGen user community again together and discuss what issues
people have and what new features we might need. Plan is to have about one day reserved for
this. Place would be CERN, which seems to be easy for many people, but video connection
will be provided as well. If you are interested, please go to <http://doodle.com/ex4tg5h7rx7ihkpr>
and let us know which dates would be suitable (or if none of the suggested, let me know via
email). In case there is general interest, but suggested dates do not work, we will try to work
alternative (some suggested dates are rather close, but I still try).
> Feel free to spread this message to anybody who might be interested.
