## Subject: Chi2 of kinematic and vertex fitters Posted by StefanoSpataro on Thu, 28 Nov 2013 16:07:39 GMT

Dear analysis experts,

I run the standard macro/run/ana\_complete.C macro and checked the chi2 distributions of the three fitters implemented there, vertex mass and 4C. Here the plots:

You can see that the vertex fitters shows still negative values of chi2. I supposed this was fixed. Did I forget something, or maybe there is still something to debug?
