Dear colleagues,

The PANDA Wiki has moved to a newer platform FOSWIKI and is now again available world wide at the usual location

  http://panda-wiki.gsi.de/cgi-bin/view

At first look you will only see open pages. To see all pages you have to login with your Wiki account on the top left. The credentials are the same as before.

The newer software has a WYSIWYG editor, If you want to use the old style editor you should edit your own page with the "Edit Wiki Text" option and add

<!--
 * Set NOWYSIWYG = 1
-->

on that page.

Please tell me in case of other problems.

Best regards,

Lars
