hi,

While running the simulation and analysis file i am getting the following error. I wanted to know the reason of getting this error & how to solve it?

1. error in fillist

2. pdg code not found in database in a red blinking line while program is running

3. could not convert genfit track to pnd track and no convergence after 21 steps

this is the error which i get while running the simulation file for all decay of x(3872)
