Subject: Re: Covariance Matrices in RhoCandidates Posted by Ralf Kliemt on Tue, 25 Mar 2014 15:24:36 GMT View Forum Message <> Reply to Message

Hello Simon,

Thanks for that finding.

Which macro do you use? I assume it is macro/run/ana_complete.C. Please check those covariances before fitting. For one, the four-momenta of the RhoCandidates and if the issue is already present there, then try the reco candidate (PndPidCandidate/FairRecoCandidate).

Cheers Ralf
