hello all

I am trying to reproduce the data in master thesis Simulation of)decays using the pandaroot framework by Martin Galuska but in the simulation file the detector tpc.geo is not found in /pandaroot/geometry in pandaroot with the revision 24201.

but when I removed the tpc detector there were the problem with the initialization and it gives

```

Macro finished succesfully.
RealTime=77.994650 seconds, CpuTime=77.200000 seconds

Output file is points_tpccombi.root
(int)1737213856
root [1]

but still here there is the problem with the output .root file and when I tried to open that file it gives me the error

```

I am also attaching that file here.

Please help me out.

Thank you
