Hello Ralf,

i'm not really sure if this simply doesn't work, or if i'm doing something wrong...
if i do:

```
PndPidCandidate *myPidcand = (PndPidCandidate*) (jpsi[j]->GetRecoCandidate());
```

this works fine, but trying to access any member-functions, for example:

```
myPidCandidate->P4Cov().Print();
```

then i get a segmentation violation.

Greetings
Simon
