Subject: Re: invariant mass Posted by Ralf Kliemt on Fri, 28 Mar 2014 10:09:52 GMT View Forum Message <> Reply to Message

Hello ForamShah,

I qoute from that WiKi page: Quote:For running the simulation, digitization, reconstruction, and PID

- * tut_sim.C Simulation with Geant3/4
- * tut_dig.C Digitization

Page 1 of 1 ---- Generated from

- * tut_rec.C Reconstruction
- * tut_pid.C Track assiociation with PID detectors
- * tut_runall.sh Shortcut shell script to run all four macros

These files are necessary to run the complete simulation and reconstruction chain.

GSI Forum

Now analysis is done with a root macro, here called tut_ana*.C. I would suggest you to copy one of the defaults given here and extend it to your specific needs.

Cheers Ralf
