You don't have enough energy, and EvtGen is not letting your pbarpSystem decay:

This top particle is pbarpSystem 4.410 (10.365,0.000,-0.000,9.380)

pbarpSystem -> D'\_s1+ D\_s- 2.525 (2.525,0.000,0.000,0.000) 3; 1.968

(1.968,0.000,0.000,0.000)

With your momentum you have  $\sqrt{s} = 4.410$ , but the mass sum of D'\_s and D\_s is  $2.525 + 1.968 = 4.493$ . This is the reason why you have such error messages from evtgen. You should increase your momentum.
