Subject: Re: Fast simulation - MCTrack block Posted by Elisabetta Prencipe (2) on Tue, 01 Apr 2014 10:53:46 GMT View Forum Message <> Reply to Message

Hi Stefano,

my invariant mass is 4.505 GeV/c2. It is the threshold to produce one Ds1' and one Ds. For this purpose, the  $p_{lab} = 9.83$  GeV/c. With this momentum set up, I don't get any problem with the full simulation. So I am wondering why.

Please, let me know. Elisabetta
