Dear all,

next SeeVogh meeting will be on 7th April 10:00 AM CET.

Apart the discussion about the standard general items, Binsong will report on how to use his bremsstrahlung correction for electron reconstruction, and after I would like to ask to all the people who communicated their wish to be involved in the fast simulation campaign, to show few slides (few!) showing their fast sim results and comparison with full reconstruction if available, even if preliminary.

Please confirm here (in the forum) your availability to provide results, even if preliminary.
