Subject: New PandaRoot release scrut14
Posted by StefanoSpataro on Mon, 07 Apr 2014 12:33:18 GMT

Dear all,
as we discussed in the SeeVogh meeting this morning, the new pandaroot release scrut14 is born, from svn release mar14. This will be the "development" release for the scrutiny campaign. It will be continuously updated with new developments and improvements in the analysis and fast simulation parts, while the general reconstruction part will remain mostly untouched. Use it only if you want to have the most updated results.

In order to download it:

svn co https://subversion.gsi.de/fairroot/pandaroot/release/scrut14
