..one more adding for Gianluigi:

as I am strongly modifying also /GenFitTools/, probably there is still something that I have to fix there. At least, this is what I understand from the error message which I have got, that is also related to the TrackRep. My question for you, then, it is just if it's possible to use PndTracking2 with stt only, in the way that the macro reco_complete.C suggests. Or if I have to write another macro, such as "reco_stt.C" for instance, to test the results.

thank you again for your answers,

Elisabetta
