Hi Elisabetta,

Did you take out a part of the genfit stuff in your pandaroot CMakeLists. There are missing libraries: the reco hits, trackrep and genfit2 during MVD compilation. Can't you add the new genfit to pandaroot without "removing" the old one? Have a look at the required libraries in the CMakeLists.txt's.

Also: Try to clean up your build directory (i.e. make a new one) when you get such errors.

Ralf
