Hi Ralf,

there is not anymore genfit in the CMakeList.txt of my trunk, but of course it is still inside the trunk. genfit(1) is not compiled at all. There is only genfit2 inside the CMakeLists.txt.

Then, I built a new CMakeList\_standalone.txt and CMakeList\_panda.txt inside the new package genfit2. I replaced in every package genfit2 instead of genfit.  
So, I am afraid I did not get what is your proposal: to delete completely the old genfit package from the trunk and try again?

cheers, Elisabetta
