Hi all,

I just modified the parameters for STT only tracking (corresponding option "MvdGem" or "1") in simfast_opt.C to

dtht: 0.06 rad -> 0.006 rad

dphi: 0.1 rad -> 0.007 rad

dp/p: 0.025/0.03 -> 0.04

(see lines 162 and 170-172 in simfast_opt.C) according to the latest info I got from the experts and checked it into trunk and scrut14.

Best,
Klaus
