Subject: [FIXED] trunk does not compile (GenfitTools/adapters)
Posted by MartinJGaluska on Mon, 26 May 2014 13:52:05 GMT

Hello all,

I just ran into compilation errors of trunk on Kubuntu 14.04 64 bit:

In file included from /home/pandaroot/trunk/GenfitTools/adapters/PndGenfitField.cxx:2:0:
/home/pandaroot/trunk/GenfitTools/adapters/PndGenfitField.h:4:35: fatal error:
core/include/AbsBField.h: No such file or directory
/home/pandaroot/trunk/GenfitTools/adapters/PndGenfitAdapters.cxx:7:18: fatal error: Track.h:
No such file or directory

Software version:

Last Changed Author: prencipe
Last Changed Rev: 25116
Last Changed Date: 2014-05-26 11:05:27 +0200 (Mo, 26 Mai 2014)

With removed adapters subdirectory in GenfitTools/CMakeLists.txt the trunk also does not
compile.

By the way, is Trac still used to submit bug reports?

Kind regards,
Martin
