Subject: pbar p cross section data Posted by Klaus Götzen on Mon, 16 Jun 2014 14:18:40 GMT View Forum Message <> Reply to Message

Hi all,

in case you are looking for possible backgrounds for your physics analysis signal channel or simply are interested in current pbarp cross section data for some channels, I created a tool which allows you to browse through available data (limited to rather well measured and strong channels). It also lets you search for channels similar to a given final state or compare experimental cross-section data with DPM cross sections.

You can find it here: http://lxpndwww.gsi.de/pbarx/

Best, Klaus
