Here is the layout of the Target and ToF crate as it was used in the 2014 campaign. I believe it was the same in 2012

```
crate LyccaTargetToFcrate
  procid 90
  module adc0 LYCCA.v785 # Target DSSSD p-side amplitudes
  module adc1 LYCCA.v785 # Target DSSSD n-side amplitudes
  module tdc LYCCA.v775 # Target DSSSD times (I don't know if p- or n-side times)
  module mhtdc0 LYCCA.v1290TMM # ToF scintillators
  module mhtdc1 LYCCA.v1290TMM # ToF scintillators
  module mhtdc2 LYCCA.v1290TMM # ToF scintillators
end
```
