Here is the layout of the Target and ToF crate as it was used in the 2014 campaign. I believe it was the same in 2012

```
crate LyccaTargetTofCrate
procid 90
module adc0 LYCCA.v785    # Target DSSSD p-side amplitudes
module adc1 LYCCA.v785    # Target DSSSD n-side amplitudes
module tdc  LYCCA.v775    # Target DSSSD times (I don't know if p- or n-side times)
module mhtdc0 LYCCA.v1290TMM # ToF scintillators
module mhtdc1 LYCCA.v1290TMM # ToF scintillators
module mhtdc2 LYCCA.v1290TMM # ToF scintillators
end
```
