Hi again,

I have one more question..

I am trying to calculate ctau for D0 meson in my analysis(123micrometers)

From the mc the calculation is correct(125micrometers).

From the vertex information I get 185micrometers..

I have looked several times my code and I could not find a single mistake..

Is there a chance, since we are talking about micrometers that the resolution is not good or there is something else wrong??

I attach my code and my results to get an idea..

Thanks!!
