Hi Shyam,
good to know the correlator with tof, but the situation is quite different with the case of emc. For a more detailed info on the emc issue, you can have a look at my slides which has been presented in the collaboration meeting:
<https://indico.gsi.de/conferenceDisplay.py?confId=2943>
The problem we have now is not only parameter optimization, but deeper in the level of algorithm itself.

With best regards,
Lu
