Hello Anastasia,

Before writing you, I included "lines" (for inelastic),
what about I wrote you,
and obtained normal Tree with about 2800 particles
in 1000 Events at 2 GeV/c initial mometum.
Without these "lines", number of particles was about 3500.

How did you obtain empty Tree?
May be, you didn't put closing "}" on the needed pkace.

Aida
