Hi FTF frontier,

I have a trouble to compile it.  
I changed LIBS in common.mk as you suggested but fail to produce executable object with  
make -f FTFmake

```
-----  
collect2: error: ld returned 1 exit status  
make: *** [FTFGen] Error 1  
-----
```

fairsoft\_apr13 and pandaroo\_trunk I am currently using.

Best wishes,  
Donghee
