Hi Donghee,

The main difficulty of FTF compilation is find right path to Geant4 library files.

In your trunk directory, please give:

```
> echo $GEANT4_LIBRARY_DIR
```

what "path" do you obtain?

If you go to this "path", do you see lib-files:
libG4clhep.so, libG4global.so, libG4physicslists.so ?

Do you observe there lib-files, proposed by Anastasia:
libG4geometry, libG4materials, libG4particles, libG4processes?

Aida
