Subject: Re: new FTF generator in pandaroot Posted by Aida Galoyan on Mon, 22 Sep 2014 09:48:53 GMT View Forum Message <> Reply to Message

Hi Donghee,

The main difficulty of FTF compillation is find right path to Geant4 library files.

In your trunk directory, please give:

> echo \$GEANT4_LIBRARY_DIR

what "path" do you obtain?

If you go to this "path", do you see lib-files: libG4clhep.so, libG4global.so, libG4physicslists.so?

Do you observe there lib-files, proposed by Anastasia: libG4geometry, libG4materials, libG4particles, libG4processes?

Aida
