dear collaborators,  
please find in svn the new version of

tracking/PndTrkTracking2.cxx  
tracking/PndTrkTracking2.h  
trackitracking/PndTrkCTFindTrackInXY2.cxx

Now the problem of the double tracks was eliminated.  
Please let me know if you have problems

Gianluigi

Gianluigi Boca wrote on Thu, 18 September 2014 16:26dear collaborator,  
as I said at the last collaboration meeting, I am finalizing the offline pattern recognition.

Presently there is a version of it in svn not complete yet.  
Because of that, for every MC truth physical track 2 tracks  
are reconstructed by the pattern recognition, essentially one clone of the other.  
So please don't be alarmed, I am finishing that piece of code right now and I think that in 1  
week or 2  
that feature will be eliminated

Gianluigi
