Hello Donghee,

please try using

```
FairFilteredPrimaryGenerator* primGen = new FairFilteredPrimaryGenerator();
```

instead of

```
FairPrimaryGenerator* primGen = new FairPrimaryGenerator();
```

as explained here.

Kind regards,
Martin

PS: I had to move all the event filter related code of FairPrimaryGenerator to its own class which I called FairFilteredPrimaryGenerator.

FairFilteredPrimaryGenerator can be used with and without event filtering as it just adds code to FairPrimaryGenerator.
