Hello Donghee,

please try using

FairFilteredPrimaryGenerator* primGen = new FairFilteredPrimaryGenerator();

instead of

FairPrimaryGenerator* primGen = new FairPrimaryGenerator();

as explained here.

Kind regards,
Martin

PS: I had to move all the event filter related code of FairPrimaryGenerator to its own class which I called FairFilteredPrimaryGenerator.
FairFilteredPrimaryGenerator can be used with and without event filtering as it just adds code to FairPrimaryGenerator.
