Subject: Re: Problem on installing external package on ubuntu 14.04
Posted by kamalpdutta on Wed, 03 Dec 2014 09:08:42 GMT

Hi ,
Thank you very much for your reply. The gsl-1.16.tar.gz file was corrupted and downloaded that file separately, put in FairSoft/basics directory, and it works.

But the same problem happened again while downloading pythia6.tar.gz. I tried to resolved by the same way, but getting another issue.

-- Configuring done
CMake Error at CMakeLists.txt:33 (Add_Library):
  Cannot find source file:

    pythia6416.f

  Tried extensions .c .C .c++ .cc .cpp .cxx .m .M .mm .h .hh .h++ .hm .hpp
  .hxx .in .txx

-- Build files have been written to:
/home/kamalpdutta/PANDA/FairSoft-dec14/generators/pythia6/build
make: *** No rule to make target `install'. Stop.
scripts/install_pythia6.sh: line 42: check_all_libraries: command not found
*** ERROR: Pythia6 could not be created.
*** End installation of external packages with Errors***

Can you please help me ?

regards

Kamal Dutta
