Hi Ciao,

Thanks for your quick reply. Yes I did source config.sh in my build directory. It echo following

```
System during compilation: Ubuntu 14.04.1 LTS
                           i686
System now                  : Ubuntu 14.04.1 LTS
                           i686
```

But still showing the same error.

regards'
Kamal Dutta
