Subject: Howto for eventdisplay Posted by MartinJGaluska on Tue, 23 Dec 2014 16:29:33 GMT

Hello,

I know that it is possible to hide individual geometry modules from being visualized in the event display. However, doing this by hand every time is quite tedious. Is there some way of doing this from within the macro itself?

I want to simulate events using the full detector geometry for testing purposes, but only want to visualize the FTS.

Kind regards and happy holidays, Martin
