dear collaborators,
following the interest expressed by several persons involved in the Pattern Recognition software development,
I collected the proposals of holding a 2 day workshop on this subject.
So far the following ideas have benne expressed :

1- a workshop in Juelich (date not defined);
2- a workshop in Pavia (end of February);
3- a workshop Frankfurt at FIAS (date not defined);
4- Michael Papenbrock expressed the desire of having the workshop before March 15th;
5- Mohammad Babai expressed the desire of having the workshop just before or after the PANDA meeting;
6- Stefano Spataro expressed the desire of having the workshop in February or April.

Please let me know if I forgot anybody's suggestion.

I would like to launch very soon a Doodle to see what's the opinion of the majority of the collaboration.

Cheers

Gianluigi
