Hi Stefano.

- 1) PndNeutral(also Charged)Cand.fMcIndex obtained by the new version of PndEmcHitProducer is identical with the one obtained by the old version
- 2) two versions of code I used are attached for checking
- 3) exactly the same
- 4) Before I check the correctness of association, I expect the fMcIndex of PID candidate will be influenced somehow due to your modification, but they didn't, so I don't understand if it 's expected or not.

Best,

Lu
