dear collaborators,

at the EVO meeting today a general consensus was achieved about dropping for the moment the initial idea of having a 2-day Pattern Recognition Workshop soon.

Instead we will try to devote Monday morning and possibly afternoon of the next Panda meeting in Giessen for a discussion among those persons interested in PR code development.

I will contact Klaus Goetzen to try include that in the meeting agenda and then circulate soon a tentative list of items we will discuss

cheers

Gianluigi
