Hi Alicia,

The boost should be downloaded and installed when you installed the external packages.

Can you please check if it was downloaded to:

`your_path_to_fairsoft/basics/`

The downloaded file should be `boost_1_54.0.tar.bz2` .

If it is not there, you can try to download it from

<http://sourceforge.net/projects/boost/files/boost/1.54.0/> to this directory

and run the installation macro again.

hope it helps,

radek
